

**TUBULAR GEL SERIES VRLA BATTERY**

**TG SERIES**

BSB TG batteries are designed to meet the requirements of heavy duty applications in high temperature. This series is highly suited for renewable energy and telecommunication systems where reliability and performance are the priorities.

The TG batteries benefit from an optimized tubular plates and gelled electrolyte which offer both a longer float life and deep cycle life. Because of the compact design, this series can be easily installed in any environment and is maintenance free.

**GENERAL FEATURES**

- Sealed and maintenance free operation.
- Non-Spillable construction design.
- ABS containers and covers(UL94 V0, optional).
- Safety valve installation for explosion proof.
- High quality and high reliability.
- Super long service life.
- Lowest self discharge characteristic.
- Super reliability.

**CONSTRUCTION**

- Positive ..... Lead dioxide
- Negative ..... Lead
- Container ..... ABS
- Cover ..... ABS
- Sealant ..... Epoxy Resin
- Safety valve ..... EPDM
- Terminal ..... Copper
- Electrolyte ..... Nano gel

**COMPLIED STANDARDS**

- IEC 60896-21/22
- IEC 61427
- UL1989
- BS6290 Part 4
